LIBRARY

RESTRICTED—THE INFORMATION IN THIS REPORT IS NOT TO BE COMMUNICATED DIRECTLY OR INDIRECTLY TO THE PRESS OR TO ANYONE NOT IN THE ARMED FORCES

ADMISSION RATES—ALL CAUSES AND RESPIRATORY DISEASES

CONTINENTAL LIMITS OF THE UNITED STATES—1944, 1945, 1946

WEEKLY MORBIDITY REPORT

RESTRICTED

CURRENT TRENDS
Week Ending 13 July 1946

The annual admission rate per 1,000 for All Causes for the week ending 13 July was 579, an increase of 24% as compared with the 467 rate of last week. This increase marked an end to the progressively downward trend that was apparent for the four preceding weeks. The rate for the corresponding period in 1945 was 598. The spurt upward in the morbidity rate this week was reflected in all Districts. The 6th District is still highest with a rate of 945, a 23% increase over the previous week. The 7th District is low for the week with a rate of 330. Seven of the Districts show rates above the continental average.

The rate for Total Respiratory Diseases was 106.2 an increase of 32.6 over last weeks rate of 80.1. A year ago the rate was 139. The increase in the rate for all causes was due to the prevalence of respiratory diseases since the other diseases reported showed decreases. The 1st District reports the highest admission rate, 236.9, an increase of 417%. The Potomac and Severn River Commands was lowest with a rate of 41.4. The increase in Total Respiratory Diseases for this week was apparent in all Districts except the 12th whose rate decreases 0.3%. Only the 1st, 5th and 6th Districts show rates higher than the continental average.

INFLUENZA AND CATARRHAL FEVER, ACUTE. The combined rate for these two respiratory diseases showed a decided upswing this week, increasing 22.8% over the previous week to 45.3. The current rate, although increasing, compares favorably to the corresponding rate a year ago which was almost twice as high, 88.17. Gains are shown by 8 of the districts, decreases reported only for the 3rd, 6th, 7th and 8th Districts. The 5th District was high with a rate of 111.6 and the 7th low with 18.1. The largest per cent increase, 56, 48 and 42 respectively, were reported by the 4th, 9th and 13th Districts.

PNEUMONIA--BRONCHO AND LOBAR. The current rate for these diseases is 1.1 as compared to 1.0 for last week and 1.0 a year ago. Gains were shown by the 5th and 9th Districts and a decrease by the 11th District. Seven of the Districts reported no incidence this week.

PNEUMONIA, ATYPICAL. With 2.8 this disease increased 115.4% over the previous week. A year ago the rate was 2.0. The 6th District is by far leading the others with a rate of 13.7. Four Districts that last week reported no incidence of this disease have cases this period. The 1st, 3rd, 8th, 9th, 12th, 13th Districts and the Potomac and Severn River Commands reported no incidence.

TONSILLITIS AND PHARYNGITIS, ACUTE. These two diseases showed the greatest uniform increase this week. The current rate is 57.0 as compared to 40.8 a week ago and 47 for the corresponding period last year. The increase was reflected in all Districts and varied from 1% for the 12th District to 1,068% for the 4th District. The 5th District remains highest and the Potomac and Severn River Commands lowest.

SCARLET FEVER. The rate for this disease showed improvement over last week by decreasing 5% to 1.9. It also compares favorably to the rate of 4 for a year ago. Incidence was reported by only the 5th, 9th and 11th Districts.

MEASLES. The rate for this disease is 2.2 as against 3.4 a week ago, and 0.96 a year ago. The decrease of 35.3% from last weeks rate for all districts was due mainly to the drop in the 8th and 11th Districts. The 3rd, 5th, 8th, 9th and 11th Districts reported no incidence. The only increase was reported by the 3rd and 5th Districts.
